Tony Bilek named 2007 Fuller Award recipient

Tony Bilek, Mc² Inc., was named the George Warren Fuller Award recipient at the Nebraska Section AWWA 2007 Fall Conference for outstanding service to the water industry. This is the highest honor given by AWWA. The award will be presented to Tony at the National AWWA Conference in Atlanta, GA, June 8-12, 2008.

Tony’s grandfather founded a plumbing firm in the 1940s. As a child, Tony enjoyed visiting the plumbing shop and doing small chores for spending money. He worked in a drug store during high school.

His career with water and wastewater began at Control Data in Omaha, where he was responsible for the operations and maintenance of a large scale ultra-high purity water system and heavy metals chemical waste treatment system.

After 13 years of service at Control Data, Tony joined Raines and Associates, Omaha. This was in 1992. He excelled in sales and service of water and wastewater equipment in both industrial and municipal markets. Tony accepted a similar position with Mc² Inc., Omaha in 1999, and is a partner in the firm.

Tony earned water and wastewater operators licenses in Nebraska. He joined the Nebraska and Iowa Sections AWWA in 1996, and is a member of NWEA, the Iowa Pollution Control Association and the Nebraska and Iowa Rural Water Associations.

He was elected to Nebraska Section board of trustees in 1998, and served as chair in 2006. He chairs the Manufacturers/Associates Council.

His hobbies include virtually anything outdoors — golf, fishing, fruit tree and vegetable gardening, biking, hiking. He “grows beautiful tomatoes,” according to his wife, Laura. Woodworking, astronomy and photography are other interests.

Laura is an assistant professor at the UN Med Center’s physical therapy department. She met Tony in a softball league, and they were married 12 years ago.

Tony has four children, Tony 23, a Creighton University graduate in graphic design; Tara 21, a student UNO, majoring in elementary education; Anna 10 and Lauren 8. The family lives on an acreage near Treynor, IA.

Save the date!
Friday, May 9, noon shotgun start
Quail Creek Golf Course
Columbus, NE
Chair’s comments

I would like to take this first opportunity to tell you that I feel privileged to serve as the Chair for the Nebraska Section. Following the lull of the holidays I can tell you that the Section Board, Committee Chairs, and individual members have been very busy.

By the time you read this column our members will have:

- Conducted one Board Meeting and busy planning another;
- Committee Chairs, new and old, will have started planning for the upcoming year with budget requests being submitted;
- Participated in the Membership Summit, represented the Section at the Regional Meeting in Oklahoma City, and in the midst of planning a trip to the D.C. Fly-In event;
- Helped plan a Water Pipe Workshop and other training events;
- Continued the Section’s involvement in development of a Nebraska WARN;
- Planned a Water for People Golf Tourney and other fundraising events, and...

I think you get the idea. Our Section and its members are involved in a number of interesting and rewarding activities. Several of you have contacted me and others and asked about how to get involved. The answer is to identify an upcoming event or committee activity that interests you and contact the appropriate Committee Chair or Board Member and ask how you can get involved. Any amount of assistance will be greatly appreciated.

Obviously being involved requires communication and I would like to announce again our effort to make participation in Board Meetings easier with the use of a dial-in conference calling account. Any member can join a Board Meeting by:

- Dialing the toll-free access number, 1.800.704.9804, a few minutes before the start of the meeting.
- When prompted, enter the participant code 252935#.

This is a new feature to our Board Meetings so we would appreciate any feedback regarding its use that you want to provide. For those Committee Chairs who would like to use the service, just contact me and I will give you the moderator code for establishing a conference call for your committee meetings.

2008 promises to be an active year and with the participation of everyone, I’m sure it will be a successful year as well. Please join us at the next Board Meeting in Columbus, Monday, March 17, at 9:30 a.m. in the Columbus City Offices, first floor conference room, or join us on the Conference Call.

**Net Income** | **$6,735.06** | **-6,165.00** | **$23,007.18**
Change is the best word to describe the Winter Board Meeting, held January 25-27 in San Diego, CA.

The biggest change will be the retirement of Jack Hoffbuhr as Executive Director.

Jack has been the face of AWWA for a number of years and a friend to everyone in the water industry. He has guided the expansion of AWWA and has been instrumental in growing the worldwide influence of the organization.

AWWA is now working with countries outside of North America and is continuing to pursue additional agreements. AWWA even signed a memorandum of understanding with the National Rural Water Association.

Jack will be missed and we wish him well. Our Section presented Jack with a bottle of wine from the Soaring Wings Vineyard, Springfield, NE, to celebrate his retirement.

The new Executive Director will be Gary Zimmerman. Gary has a solid business background from working for a Fortune 500 company and an information technology company.

AWWA issued a press release February 4 with all of his vital information. His experience and resume are impressive, however what emerged as his most redeeming aspect was his desire to make a difference in this world that will benefit others, a commitment to service.

AWWA’s mission is to be the authoritative voice of the water industry. We are growing to meet that challenge but to do so will require a steady hand and a willingness to make smart business decisions. It will be fun watching AWWA move forward under Gary’s direction.

Our homework assignment for the Board meeting was to read “7 Measures of Success, What Remarkable Associations Do that Others Don’t.” The author also wrote “Good to Great.”
The Executive Committee is working to move the Association to the next level, which involves actively working our strategic plan while staying true to our mission.

The change to a great organization will be hard work for the Board, however we are committed to make the change. There will be difficult choices as some outdated programs are terminated. Again, change is coming.

Craig Woolard from the Alaska Section will be the new president-elect. Many of you met Craig at our Annual Conference this past November. Craig has an ambitious plan for the Association and the Board will be busy.

One of the common themes throughout the Board Meeting was the need for the Board to be more responsive to the members. The Board needs to listen, however members and Sections need to bring their concerns forward. Our primary goal is service to our members.

Please be responsive to the customer surveys and let me know if you have any concerns. I will be sure to pass on your concerns, requests and suggestions.

Finally, the Board elected several new officers including four new vice-presidents. Unfortunately, Nebraska did not do well in the elections.

Hopefully the Section Board will not bring in Tom Osborne to clean house and change direction. Jack Daniel, Nebraska Health & Human Services, ran for director-at-large and I ran for vice-president. Jack and I would like to thank everyone who encouraged us to run and for their votes of confidence.

**Nebraska Section AWWA historic leaders**

**M.U.D. employee publication, May 1963:**
At the recent AWWA meeting, a lifetime membership was awarded to John C. Detweiler in recognition of his 33 years of active participation in the organization. He has been an active member since 1930 when the local section was known as the Missouri Valley Section. He served as National AWWA Director during the years 1947 to 1950. In 1950, he was given the George Warren Fuller Award, one of the Association’s highest awards for distinguished service.

**M.U.D. employee publication, September 1964**
Many of the Water Department improvements at the Metropolitan Utilities District were the result of distinguished service to the District by the late John C. Detweiler, who began his career with the District in 1923 as a field engineer, left for two years and came back for 34. He was the first M.U.D. executive to earn the American Water Works Association’s George Fuller Award for “water supply engineering and leadership.”

Mr. Detweiler was hailed as “Mr. Waterworks” in a newspaper article on his retirement September 1, 1964. “A city’s utilities must keep a jump or two ahead of a city’s growth,” a World-Herald editorial said four days later. “And one who keeps that pace for 34 years, as Mr. Detweiler did, can look back with great pride on the part he played.”

John C. Detweiler earned a bachelor’s degree from UNL in 1922. He joined M.U.D. in 1923 as a field engineer. He left for about two years and then return as superintendent of Water Operations. Besides his affiliation with AWWA on the Section and National levels, he was president of the Nebraska Division of the American Society of Civil Engineers and president of the Engineers Club of Omaha.

For 34 years, he and his family lived in a 10-room house on the grounds of the Florence Water Treatment Plant. This was the longest period of the five families who lived there.

Do you know how often you turn me on?

This catchy phrase is referring to your trusty water faucet, and is being used in the “Only Tap Water Delivers” campaign, developed by National AWWA.

This project is a grassroots movement to promote the incredible value of tap water, and to encourage the essential infrastructure investments necessary to keep safe drinking water flowing from your faucet and high-pressure water delivered to your corner fire hydrant.

The key message is that tap water delivers like nothing else can... in protecting public health; ensuring fire protection; supporting economic development; and upholding our quality of life.

The drive already has been successful on a national level, spreading this vital message. The Nebraska Section’s Public Information Committee is planning a series of the campaign’s public service announcements to be relayed on radio stations statewide.

A free packet of campaign materials also is available to AWWA utility members. Included are: Handouts, print ads, PSAs, PowerPoint presentations, and more. Water utilities play a crucial role in the dissemination of community awareness and safety information. What better way to facilitate this than with the Only Tap Water Delivers campaign? Water utilities are often taken for granted, so they shouldn’t be afraid to toot their own horn.

Visit drinktap.org for more information about Only Tap Water Delivers.

I’m going to go take a cold shower now, thanks to my local water utility!

Public Information Committee

The Public Information Committee includes myself, Brian Gongol, DJ Gongol & Associates, and Marc Rosso, HWS Consulting Group (vice-chair). We recently updated the goals of the committee, and they are listed below.

1. Provide timely information to national AWWA.
2. Provide press releases/media coverage for Safe Drinking Water Week, annual conference, and other events or information as needed.
3. Provide drinking water information to the media throughout the year, i.e., public service announcements.
4. Investigate alternative methods to deliver public information.
5. Provide for continuity of the committee.
**What is WARN?**  
*by Rich Koenig, Nebraska Health & Human Services*

“WARN” stands for “Water Agency Response Network.” You will be receiving literature, presentations and other sources of information regarding the WARN program in Nebraska.

As such, an explanation of what NeWARN really is, why we need NeWARN, and how NeWARN will work, is necessary.

NeWARN is the water sector (water/wastewater/storm water) committed to “Utilities Helping Utilities” concept. It is mutual aid among various water agencies. Most water agencies currently participate in verbal mutual aid agreements.

What NeWARN will do is take these existing verbal agreements and turning them into a formal agreement. This formal agreement eliminates some of the hazards associated with verbal agreements. Some examples are, who is responsible for reimbursement, what is to be reimbursed for, insurance coverage – vehicle, workmen’s comp, etc, to name a few.

With the establishment of NeWARN, there will be a pre-established agreement among a network of utilities which can complement and enhance local capabilities to prepare for and respond to a broad range of threats, both natural and man-made.

The establishment of such interstate and intrastate mutual aid and assistance networks is a core principle of the National Preparedness Goal developed by the Department of Homeland Security. NeWARN also allows utilities to provide assistance with personnel who have experience in that specific utility.

A Steering Committee will implement NeWARN. This Steering Committee is made up of a cross-section of organizations, state agencies and utilities.

The committee has representatives from Nebraska Section America Water Works Association; Nebraska Water Environment Association; Nebraska Rural Water Association; Midwest Assistance Program; League of Nebraska Municipalities; Nebraska Emergency Management Agency; Nebraska Department of Health and Human Services, Division of Public Health; Nebraska Department of Environmental Quality and eight utility representatives.

The NeWARN Steering Committee will develop and guide the implementation of the program.

Further updates regarding NeWARN will be provided in the near future. In the mean time, if you have any questions, comments or concerns regarding NeWARN, please feel free to call any of the NeWARN Steering Committee Officers. They are:

- **Chair Steve Boeselager**, Area 8 representative, City of Chadron, (308.432.0522)
- **Vice-Chair Steve Crisler**, NWEA representative, City of Lincoln, (402.441.7966)
- **Secretary Rich Koenig**, NDHHS, DPH representative, (402.370.3114)
- **Treasurer Rob Pierce**, LNM representative (402.476.2829)

---

**Water for People Committee**  
*by Craig Reinsch, Olsson Associates (402.474.6311) e-mail: creinsch@oaconsulting.com*

Thanks to all who participated in last year’s Water for People (WFP) fundraisers. We were all able to make a difference! We raised $2,900 at the golf benefit and $1,330 from the annual conference raffle.

Winners of the 2007 raffle were:

- **First place** ($250) – **Julie Vales**, Lincoln Water System;
- **Second place** ($150) – **Kirk Morgan**, Nucor;
- **Third place** ($100) – **Doug Allen**, Nebraska Health & Human Services.

Upcoming events for 2008 include the May 9 golf tournament — noon shotgun start at Quail Creek, Columbus, plus some possible additions. Stay tuned for details!

The WFP Committee includes: **Glenn Dostal, Teresa Konda**, HDR Inc.; **Ben Day** and myself, Olsson Associates. If you would like to be involved in this great organization, please contact me.

*A child dies every 15 seconds due to unsafe water and poor sanitation!*

Scholarship Committee

by Lynn Wegehaupt, Metropolitan Utilities District, (402.504.7855); e-mail: lynn_wegehaupt@mudnebr.com

The committee received six applications for scholarships and awarded three $500 scholarships in 2007. The scholarships were presented to:

Samuel Saunders, a graduate student at the UNL, holds a Bachelor of Science degree in Civil Engineering from the University of Virginia.

Samuel wrote, “My goal is to be in a position to help societies lessen their impact on the environment while protecting them from environmental hazards. I believe the greatest challenge facing the water treatment industry is to provide safe drinking water for an increasing population with a constant or decreasing number of natural sources. Globally, there still are many places without adequate drinking water, most of which lack the money and expertise to fix the problem. I hope to help communities solve these problems.”

Hunter Flodman, a graduate student at the UNL, has an undergrad degree in Chemical Engineering.

He stated, “I would like to work in a field where I can combine my Chemical and Environmental Engineering. I feel one of the challenges in the future will be maintaining the availability of potable water in quantities to meet the demand. The public, agriculture and industry will need to focus more on water conservation and reuse.”

John Geringer, an undergraduate in Civil Engineering at UNO, is an intern with the Environmental Quality Control Division, City of Omaha Public Works Department. He plans to pursue a career in Environmental Engineering.

John wrote, “In my job with the City of Omaha, I became familiar with the impact that plants and businesses can have on the water in our streams.”

Members of the 2007 Scholarship Committee also included: Dr. Bruce Dvorak, UNL Civil Engineering; Chip Haas, HDR Inc., and Jon Zellars, Metropolitan Utilities District. Jon chairs the committee in 2008.

Brief Notes

Roger Helgoth has been named President of Kirkham Michael Consulting Engineers. He will continue to oversee the Nebraska practice in addition to his duties as president.

Money for Seminars

The Nebraska Section AWWA realizes budgets are tight so we offer grants for water operators to attend seminars and the Annual Fall Conference.

To apply, complete the application on page 15. Questions? Call Jon Zellars, 402.504.7925, or e-mail jon_zellars@mudnebr.com.
Pipe seminar March 26

The Nebraska Section AWWA is sponsoring a pipe seminar, Wednesday, March 26, 8:30 a.m.-4:30 p.m., at Mahoney State Park, Ashland. This seminar is a follow-up to the pipe seminar held last year.

The 2007 seminar focused on pipe design.

The 2008 workshop will cover construction techniques and methodologies, and water system asset management.

Early registration (prior to March 14) is $40; $50 after that date, and includes morning and afternoon breaks, lunch, park entry permit and workshop notebook.

Five hours of water operator CEUs or five hours for Engineer Professional Development.

The workshop is designed for professional engineers, water operators and managers, and public works and utility administrators.

For more information and to register, go to the Nebraska Section AWWA website: http://www.awwaneb.org. Click on “training.”

Water operator workshops

March 25 Chadron
March 26 Bridgeport
March 27 North Platte
April 29 St. Paul
April 30 Fremont
August 5 Broken Bow
August 6 Valentine
August 7 O’Neill
September 10 Cozad
October 7 Sidney
October 8 McCook
November 19 North Platte
December 10 Lyons
December 11 Lincoln
January 6 Gothenburg (tentative)
January 7 Aurora (tentative)
January 8 Blair (tentative)

Backflow Workshops (Five CEUs for Grade 6)

September 23 Beatrice
September 24 Wayne
September 25 Grand Island
September 26 Ogallala

The agenda for the water operator training covers well and pump operation and maintenance; electrical safety (lockout/tagout), and regulatory and management asset updates. Each workshop begins at 8:30 a.m. and ends at 3:10 p.m.

Who should attend? City officials, city council members, board members, superintendents and well as water operators.

• Cost is $35 per person for lunch and workshop materials. Direct bill to municipality is preferred because weather may affect cancelation of workshops. Participants may pre-register one week prior to the workshop or register at the door.
• Workshop recertification credit is five CEUs for Grades 1-4.

Water workshop reimbursement:
Water operators from municipalities of less than 3,300, who attend water workshops may be eligible for reimbursement of registration, certification fees, materials and mileage.

Applications for reimbursement may be downloaded from the Nebraska Health & Human Services website: http://www.hhs.state.ne.us/crl/rcs/water/water.htm. For information, contact Mike Wentink, Nebraska Health & Human Services, 308.535.8135; e-mail: mike.wentink@dhhs.ne.gov.

Registration for the following courses is required at least two weeks prior to the class — seating is limited. Call Barb at 402.471.0523.

Public Water System Regulation Review
Health & Human Services Public Health Division recommends the review for Grade IV course attendees. The review begins at 1 p.m. on the afternoon prior to the two-day Grade IV course. Open to all:

Grade IV: Cost is $80 for the class; $98 for the books if needed; $94 for certification.

April 22 North Platte
May 20 Beatrice
July 22 Scottsbluff
September 9 Fremont
December 16 Grand Island

Grade III: Cost is $200 for the class; $98 for the books if needed; $94 for certification.

April 23-24 North Platte
May 21-22 Beatrice
July 22-24 Scottsbluff
September 10-11 Fremont
December 17-18 Grand Island

Grade I and II: Cost is $200 for the class; $98 for the books if needed; $94 for certification.

March 31-April 4 Grand Island
October 6-10 Beatrice

Reminders for Certified Water Operators:
• A minimum of 15 hours of continuing education is required to renew a water operator certificate.
• If you moved since receiving your last water operator certificate, please notify Health & Human Services at 402.471.2713 to report the change of address.
Lincoln Water System tower to improve water pressure

The Lincoln Water System (LWS) is building the City’s first elevated water tower which is scheduled to be complete in late summer of 2008.

The water tower was originally identified in the City’s CIP to be built in 2012. Due to rapid commercial growth in southeast Lincoln, the need for the tower became more urgent and moved up on the CIP.

While this area currently is served by a booster pump station with a backup generator, there is no water storage in this pressure district. When there is a disruption in power, there is a slight delay in startup of the generator, and some businesses experience a decrease in water pressure.

The tower will solve this problem by providing consistent pressure through the Cheney Pressure District. It provides the ability to expand the serviceable area of the district and adds storage to meet peak fire demands. The new tower will not be dependent on continuous electrical power to deliver water.

Various tank styles were evaluated for this project based upon a life cycle cost analysis which considers long term operations and maintenance including periodic re-painting of the tank.

The tower style was selected to be a composite elevated tank (CET) which consists of a concrete column with a steel tank. This option yielded the lowest long-term maintenance costs.

The water tower capacity is 2 million gallons and is served by a new water main that was designed in conjunction with the tower project.

Lincoln Water System tower to improve water pressure

Height: Approximately 130 feet to overflow
Capacity: 2 million gallons
Cost: Approximately $3 million
Owner: Lincoln Water System, City of Lincoln
Contractor: CB&I
Engineer: Olsson Associates, Black & Veatch
The 100th Nebraska Legislature, second session, began its 60-day session January 9. The Nebraska Section AWWA is following the proposals listed below. To see the entire bill, go to the Unicameral’s website: http://nebraskalegislature.gov.

The 2008 bills mainly relate to agricultural irrigation and have little impact on water systems.

**LB 295** – (Natural Resources Committee) Changes and eliminates provisions relating to irrigation and regulation of water and water wells. Amended into LB 701, which passed in the 2007 session.

**LB 387** – (Langemeier) Requires plumbing and water meter installation for new construction. Hearing held 2-27-07. This bill would have the greatest effect on water utilities.

**LB 391** – (Mines) Changes provisions relating to public records and meetings. Among other things, requires a public body to have a form available to allow citizens to recommend subjects for agenda items. General File, 3-13-07.

**LB 493** – (Langemeier) Change provisions relating to the Water Policy Task Force. Killed 1.30.08.

**LB 622** – (Pirsch) Requires training courses in public records and the Open Meetings Act for all members of public body, public officials and public employees. General File, failed to advance 4-2-07.

**LB 742** – (Johnson) Changes licensure requirements for engineers. Health & Human Services; hearing 2.27.08

**LB 901** – (Johnson) Provides immunity from damage and injury claims made against “emergency management workers,” which includes performing “restoration of public utilities.” This bill covers utility workers who respond to disasters, emergencies and civil defense emergencies. Judiciary Committee. Hearing held 1-31-08.

**LB 924** – (Fischer) Provide for streamflow depletion offsets; change provisions relating to the Nongame and Endangered Species Conservation Act, instream flow appropriations and evaluation of water supplies under the Nebraska Ground Water Management and Protection Act. Natural Resources Committee; hearing held 2.7.08.

**LB 1041** – (Christensen) Protect water purchased or leased for river-flow enhancement purposes. Natural Resources Committee; hearing held 2.7.08. This bill could have positive side affects in recharging wellfields.

The committee plans to hold a couple events in 2008.

- **Ben Day**, Olsson Associates, will organize a tour at Griffin Pipe this spring.
- The group plans to participate in the Earth Wellness Festival, March 19, in Lincoln.
- **Teresa Konda**, HDR Inc., is organizing a demonstration of the Section’s Groundwater Model at the Children’s Groundwater Festival, May 13 in Grand Island. **Justin Stine** and possibly another JEO employee will help at the festival.
- Other members are encouraged to find additional activities for the year.

The Committee is looking for another committee member — preferably someone who is not an engineer to add diversity to the committee.

In addition to Day, Konda and Stine, other members include: **Jordon Bang**, City of Fremont; **Craig Reinsch**, Olsson Associates; **Chad Roberts**, City of Norfolk; **Marc Rosso**, HWS; **Gina Rust**, HDR Inc.; **Rory Sudbeck**, Schmit-Greteman Associates, and **John Velehradsky**, Metropolitan Utilities District.

---

**$20 (individual membership) or $10 (operations membership)**

This coupon, when attached to a completed application for membership in AWWA with payment of membership dues (less the amount of this coupon), entitles the bearer to a discount of $20 ($10 for operations membership) to be used towards the cost of that membership. To be valid, the following lines must be completed:

________________________________________________________________________
Name of applicant

________________________________________________________________________
Name of recruiter

Recriuter’s membership no.

Mail coupon and application with payment to: Rob Pierce, League of Nebraska Municipalities, 1335 L St., Lincoln, NE 68508-2506; (fax: 402.476.7052).
### Annual Fall Conference, November 7-9, 2007

Water Industry Service Award recipients, from left, seated: Paul Reed, Metropolitan Utilities District; National AWWA President-Elect Craig Woolard, Anchorage, AK; Doug Woodbeck, Nebraska Health & Human Services.

Standing: Wayne Rickers, Beatrice Board of Public Works; Nick McElvain, Lincoln Water System; Kenneth Swanson, Auburn Board of Public Works, and Doug Pollack, City of Seward.

### WISA Awards

**Nick McElvain**, water operations support and distribution manager, Lincoln Water System, joined the utility in 1975 as a project engineer. He advanced to his current position in 1992 where he manages a $5 million budget and 40 employees. He oversees the meter replacement, cross-connection programs, plans for community growth and infrastructure financing and manages an annual capital improvement budget of $8-$18 million. A UNL graduate with a BS in civil engineering, Nick holds Grades 1 and 6 water operator certifications.

**Doug Pollack**, City of Seward Water Department, joined the utility 28 years ago. He is a facilities maintenance supervisor for the reverse osmosis water treatment plant. A Grades 2 and 6 water operator, Doug also is a water operator for the Village of Glenhaven.

**Paul Reed**, vice-president of Engineering and Construction, Metropolitan Utilities District, joined the industry 42 years ago as an engineer. He supervises more than 200 employees and is responsible for the design, installation and maintenance of 2,635 miles of water mains and 2,511 miles of natural gas mains. He also is responsible for the specifications and maintenance of more than 300 vehicles and heavy equipment. Paul earned a bachelors degree in Industrial Engineering from UNO in 1965.

**Wayne Rickers**, Beatrice Board of Public Works, began his career in 1983 as a utility maintenance worker, advancing to water technician in 1997. He is responsible for water sample collections, daily inspections of 12 wells, two overhead storage tanks, two underground reservoirs and a pump station. He does all the maintenance on the SCADA system and updates maps with system improvements and additions. Wayne is a Grades 3 and 6 water operator.

**Kenneth Swanson**, water/wastewater manager, Auburn Board of Public Works, joined the utility 36 years ago. He holds certification as a Grades 2 and 6 water operator. He is responsible for the operation of the city’s water and wastewater plants and supervises water technicians and a wastewater operator.

**Doug Woodbeck**, field services manager, Nebraska Health & Human Services Public Health Division, began his career in the water industry with the City of Gordon in 1980. Ten years later, he joined Nebraska Health & Human Services as a field representative in the North Platte office. He was promoted to his current position in 2002.
The Section and Nebraska Health & Human Services presented awards to the following members, from left, seated: Rich Robinson, Kirkham Michael Consulting Engineers (Lifetime Membership); Steven Boeselager, City of Chadron (Water Operator Award).

Standing: Kathleen Alexander, HDR Inc. (Outstanding Volunteer Award); Tony Bilek, Mc² Inc. (Fuller Award); National AWWA President-Elect Craig Woolard of Anchorage, AK, and Glenn Dostal, HDR Inc. (Ken J. Miller Founders Award).

Water Operator Award

The Nebraska Health & Human Services Public Health Division presented a water operator award to Steve Boeselager, City of Chadron. The Department noted that Steve not only runs a good system during normal operations, but kept the system running, with the help of good staff, during a transmission water main break and a forest fire.

The forest fire threatened not only homes and businesses, but also the drinking water reservoirs. He and his crew kept the water plant running, supplying water to customers and fire departments.

A graduate of Chadron State College, Steve worked for the City of Crawford Public Works Department from 1999-2002 in the Public Works Department, and joined the City of Chadron as Utilities Superintendent in May 2002. He is a Grade 2 and 4 water operator, plus a Class L wastewater operator.

Safety Awards

Safety award recipients, from left, seated: Steve Kelley, Beatrice Board of Public Works; David Lathrop, City of Seward; Rollin Davis, City of Ord; Kenneth Swanson, Auburn Board of Public Works.

Standing: Gerardo Martinez, Lincoln Water System; Lynn Wegehaupt, Metropolitan Utilities District; Larry Andreasen, Fremont Department of Utilities; Robert Smith, Grand Island Utilities Department, and Jack Satur, City of Scottsbluff.

Unavailable for photo: Cities of Crete, Norfolk, Nebraska City and Village of Lyman.
First Place Top Ops Team, from left: Herb Scott, Servi Tech; National AWWA President-Elect Craig Woolard, Anchorage, AK, and Kristen Ostdiek, Servi Tech.

The Second Place Top Ops Team included: Mary Maher, Jon Zellars and Mike Koenig, Metropolitan Utilities District.

Members of the Third Place Team were: Rollie Cederberg, Chad Roberts and Dennis Watts, City of Norfolk.

For the national competition June 9 in Atlanta, our team needs to be composed of non-engineer water operators, so members of the third place team will join the first place team in representing the Nebraska Section.

The National Top Ops Competition allows only water operators to participate. So, Chris Koenig, HDR Inc., organizer of the Top Ops Competition since 1996, developed a Non-Top Ops Competition for engineers and other professionals.

The first place Non-Top Ops team included, from left: Brock Beran, Schemmer & Associates; Craig Wilson, Vessco Inc., and Allen Shoemaker, City of Blair.

2008 Board of Directors

Front row, from left: Trustee Eric Lee; Lincoln Water System; Director Chris Koenig, HDR Inc., Chair Kevin Tobin, Metropolitan Utilities District; Trustee David Lathrop, City of Seward.

Back row: Secretary Teresa Konda, HDR Inc.; Treasurer Rob Pierce, League of Nebraska Municipalities; Past-Chair Mike Wentink, Nebraska Health & Human Services; Vice-Chair John S. Olsson, Olsson Associates, and Chair-Elect Dr. Bruce Dvorak, UNL Civil Engineering.

Unicameral overrides fluoride bill veto

Senators overrode Governor Dave Heineman’s veto of LB 245 April 17 with 31 votes. LB 245 requires all Nebraska cities and towns with populations over 1,000 to add fluoride to public water systems. Provisions will allow communities to vote to opt out of the requirements by 2010. Those places where there is enough naturally occurring fluoride wouldn’t have to add any.

Many cities already have opted out of the current law requiring them to fluoridate water. Those that have opted out in the past would have to vote again to keep from adding fluoride.

Most of Nebraska’s population — more than 942,000 people — is served by 65 public water systems that add fluoride to water. Forty-one systems are naturally fluoridated. But 64 Nebraska communities with more than 1,000 people don’t add fluoride or have enough naturally occurring. Those add up to more than 297,000 people in cities such as North Platte, Grand Island and Norfolk.

Cities that don’t fluoridate could have capital costs of about $5,000 per treatment point, which means larger cities such as Hastings would have to pay as much as $100,000 upfront to start fluoridating water.

Water for People trapshoot, June 3

The Water for People Committees of the Nebraska and Iowa Sections AWWA have partnered to sponsor a shotgun trap and skeet event, Tuesday, June 3, at the Harry A. Koch Trap & Skeet Range, 6802 Harrison St., (72nd & Harrison Sts.), Omaha.

This is the place to be and you literally will save lives at the same time by providing the funds for water and sanitation projects in underdeveloped areas. Shooting is on an individual basis and prizes are awarded at random, provided you can bust your prize bird! Skill is not a prerequisite; only a good sense of humor and we all have a safe time.

Bring your shotgun, eye protection (eyeglasses are acceptable) and hearing protection. If you need any of these items, contact Craig Reinsch. You may purchase shells from the range, however, you also can purchase shells from big box and sporting goods stores at lower cost (target loads only; low-brass shells, shot size 7 1/2, 8, or 9, with maximum loads of 1 1/8 oz.).

Lunch and practice rounds are from 1-2 p.m. Traps and skeet shooting is from 2-5 p.m. Registration fee is $15. Rounds are $7.50 for 25 targets. Lunch and beverages will be provided. Preregistration is required – payment due the day of the event (weather permitting).

Download a registration form from the Section’s website: http://www.awwaneb.org, and mail the completed form to Craig Reinsch, Olsson Associates, PO Box 84608, Lincoln, NE 68501-4608 to give us an accurate lunch count.

For additional information please contact Craig at 308.995.8706; e-mail: creinsch@oaconsulting.com.

In February, I joined Mike Wentink, Bruce Dvorak and David Lathrop at the Regional Section Officers Meeting (RMSO) in Oklahoma City. The RMSO is a great way to get firsthand information from National AWWA and other sections as to what works for them. This was our first RMSO since the regions were reorganized. Our Section now includes: Kansas, Missouri, Rocky Mountain (Colorado, Wyoming, and New Mexico), Inter-Mountain (Utah and eastern Idaho), Arizona, Southwest (Oklahoma, Arkansas and Louisiana), Texas and Mexico.

These are larger sections than our own and we can use the meetings to gather information on what works for them. We also can also show that in terms of innovativeness, cooperation and individual effort, our small section stacks up pretty well when compared to these sections.

I encourage Board Members and Committee Chairs interested in serving on the Board to consider attending a future RMSO.

Congratulations to Susan Franceshi on her recent promotion to National AWWA Manager of Section Services. Susan has been to Nebraska a couple times and knows our Section quite well. We wish her success!

Bruce Dvorak is busy organizing the Fall Conference Program for November 6-7 in Kearney. It is shaping up to be an interesting program, thanks to all of you who submitted ideas for presentations.

Fundraising takes center stage this spring and early summer. In addition to our Water For People Golf Tournament Friday, May 9, in Columbus, Craig Reinsch has organized a Water For People Trapshoot in Omaha, June 3. Good shooting to all!

I would like to remind everyone that you can join our Board Meetings with the use of a dial-in conference calling account. It’s just a couple easy steps:

- Dial the toll-free access number, 1.800.704.9804, a few minutes before the start of the meeting,
- When prompted, enter the participant code 252935#.

Please join us at the next Board Meeting in Columbus, May 9 at 9:30 a.m. in the Columbus City Offices, first floor conference room or join us on the conference call.

Thank you to Tony Bilek, Mari Matulka, Metropolitan Utilities District, and Mike Wentink, Nebraska Health & Human Services, for putting together a brochure for the Section, designed to recruit young people to careers in the water industry.

The Section has begun planning for the annual meeting in Kearney, November 6-7. The first item of the conference will be a town hall meeting with the visiting officer from national. The meeting will give our members a chance to present their thoughts and concerns to a member of the Executive Committee.

AWWA President Nilaksh Kothari understands the importance of customer input. All of us are the customers of AWWA and the purpose of the Association is to serve us. There is no agenda; all topics will be open for discussion including programs, products, customer service and assistance.

Information from this meeting will be provided to Executive Committee to improve the Association. I encourage everyone who attends the conference to make this meeting a top priority and participate.

AWWA is providing webcasts on a variety of topics from membranes to maintaining ductile iron pipe. The webcasts replace the teleconferences and are a great source of information. Go to http://www.awwa.org/education/webcasts for more information.

The Annual Conference and Exposition (ACE) will be held June 8-12 in Atlanta, GA. The Atlanta area is recovering from tornadoes that hit the area in March. The good news is the conference center is on track to be ready for ACE. The bad news is the windows still are missing from my hotel room. Conference registrations are strong, the area is receiving some much needed rain, and we look forward to a great conference.

I just received the first quarter financial statements. Revenues are well ahead of projections and expenses are below projections. Membership continues to increase.

The Association continues to meet concerns raised by the news media about the water industry. Stories vary from pharmaceuticals in the drinking water to inadequate infrastructure.

The good news is that AWWA is contacted on a regular basis to provide comment. For example, NBC plans to air a story on infrastructure and AWWA will provide a national perspective. AWWA was quick to respond to the pharmaceutical story and continues as a resource as questions arise.

In other news, the Saudi Arabia Standards Organization announced the adoption of the AWWA Standards referenced in the Saudi Building Code. AWWA also is meeting with the World Bank to evaluate the possibility of AWWA assisting the Indonesians in building their Association’s capability.

Beyond the exposure for AWWA and doing good in the world, these alliances continue to build the stature of AWWA in the world community and provide a new source of revenue for the Association.

Now get out and enjoy Spring!
Charles Durham, the civil engineer who built Omaha-based HDR Inc. into one of the nation’s largest engineering and architectural companies and whose later philanthropy poured millions of dollars into the region’s education and medical research institutions, died April 5 of heart failure.

“Chuck Durham did more than build buildings. He built people,” said John Wilson, president of Durham Resources, the company that Durham founded to manage his investments. “He was a true mentor to all who were privileged to work with him.”

Durham vowed never to retire and thrived on the action of investing in businesses and people. He visited his office at Durham Resources, where he was chairman and chief executive, as frequently as he could and often called associates on weekends with ideas about projects.

Among his favorites were twin research towers at the University of Nebraska Medical Center in Omaha. Durham donated tens of millions of dollars to the initiatives. He was the campus’ single largest benefactor and was recognized with the first Regents Medal in 2007 for giving more money to the University of Nebraska than any other living donor.

The first tower opened in 2003. Durham attended the groundbreaking ceremony for the second tower in August 2006. Construction on that tower is under way. Durham was a visionary and a doer, UNMC Chancellor Harold Maurer said.

“Nothing was impossible with Chuck,” Maurer said of the 6-foot-3, no-nonsense engineer, nicknamed “Bull” by his Iowa State University friends.

Walter Scott Jr., former chairman of Peter Kiewit Sons’ Inc., said Durham actively looked for opportunities to make things happen in Omaha. “Few have been as generous with their time, leadership and resources, and few have had an impact on so many of our civic and charitable organizations,” Scott said.

Durham shrugged off accolades, saying it was fun to find and finance new projects to help people, especially in his adopted hometown of Omaha. Seeing his name on buildings and other public recognition embarrassed him a bit, but he said it was worth it if it inspired others.

He credited his wife, Margre, who died in 1999, with influencing their philanthropy. Durham had a stock answer when asked about the secret to his success. “I’ve been lucky,” he said. “Lucky” is the name of a Durham biography.

Raised in Ames, Iowa, Durham began working at age 11. He paid his own expenses from earnings as a paperboy. He worked his way through Iowa State clerking full-time in a hardware store.

The son and grandson of civil engineers, Charles W. Durham enrolled at Iowa State during the Depression and planned to study law because the job prospects seemed bright. He changed his mind after falling in love with fellow ISU student Margre Henningson of Omaha.

Margre’s father, H.H. Henningson, owned Henningson Engineering Co. in Omaha. He persuaded Durham to study engineering and to work for him during summers for $3 a day, then full time after he graduated.

“My dad and Chuck adored each other. . . . I’ve always said ours wasn’t a marriage, it was a merger,” Margre Durham once quipped.

The company played a key role in organizing Nebraska’s public power districts and bringing electricity to rural areas in the 1930s.

Durham once said that Nebraska looked like the Dakota Badlands when he graduated from college. “It became a beautiful garden, because with rural electrification came irrigation,” he said.

During World War II, Durham was assigned to build military installations across the country, including the Lincoln Army Air Base. He held the rank of Army captain After the war, he returned to Henningson Co. as civil engineer in charge of municipal projects.

In 1950, Henningson turned over leadership of the company to Durham, who became president of the renamed Henningson, Durham & Richardson Inc.

Durham’s sales and leadership skills built the company — later known simply as HDR Inc. — into an international force. He traveled the world seeking business and supervising architectural and engineering projects. He was an instrument-rated pilot and used a fleet of aircraft to meet deadlines.

Over three decades, Durham built HDR from 15 employees working on Nebraska paving and sewer projects to a company of 1,700 workers with offices in 20 cities and contracts in all 50 states and 27 foreign countries.

The firm achieved national prominence in building hospitals; designing military facilities for the Strategic Air Command and other Air Force entities; and handling public works projects in the United States, Europe, Asia and South America.

Durham’s interest in health care began in the 1960s, when Omaha’s Methodist Hospital asked HDR to design its new building. The design became a national model, and HDR became the country’s leading designer of hospitals.

After selling HDR to a French company in 1983, Durham focused on private investments through Durham Resources and charitable giving. He remained chairman emeritus of HDR.

He served on many boards of directors of civic organizations and foundations. He was a director of the Panama Canal Co.; a director of the U.S. Chamber of Commerce; president and director of Chief Executives Organization; and president and national director of the Nebraska Society of Professional Engineers.

He founded Omaha Junior Achievement and the Nebraska Chapter of the Young Presidents’ Organization.

Durham’s charitable giving focused on Omaha and Nebraska.

He contributed to Omaha’s Henry Doorly Zoo and spearheaded renovation of Union Station into Durham Western Heritage Museum.
When you're looking for high-quality ductile iron pipe and fittings in a wide range of sizes, check out what we have to offer at American Ductile Iron Pipe. At AMERICAN, all of our pipe is hydrostatically tested and consistently exceeds AWWA ductile iron pipe standards. So before you begin your next project, turn to a company that delivers. Call AMERICAN.

Durham (continued from previous page)

which has just been renamed simply the Durham Museum. He was involved in Joslyn Art Museum and served on its board. An Eagle Scout as a boy, Durham was board chairman of the Mid-America Council of Boy Scouts of America.

Because of Durham’s generosity, the NU Medical Center was the eighth such facility in the nation to do surgeries assisted by a robot. In Omaha, the robot is named “Chuck.”

In addition to Durham’s contributions to UNMC, he was a major donor to the University of Nebraska at Omaha and to Iowa State. The Durham Science Center at UNO is named in his honor. He was the major contributor to the Computational Center at ISU.

He served an unprecedented two terms as chairman of the Greater Omaha Chamber of Commerce. He was named king of Ak-Sar-Ben, a civic organization, in 1982 to honor his community leadership and was The World-Herald’s Midlander of the Year in 2002.

Survivors include his son, Steve Durham of Dallas; daughters Mary Helen “Sunny” Lundgren and Lynne Boyer, both of Omaha, and Debby Durham of Fremont; nine grandchildren and six great-grandchildren.
The Earth Wellness Festival was held March 19-20 at Southeast Community College, Lincoln. During the past 14 years, the event has hosted nearly 40,000 students and teachers in Lancaster County. Ben Day, Olsson Associates, presented a groundwater video and the Section provided use of its groundwater model for the presentation.

The students loved the hands on activity, learning about the model and the importance of protecting our groundwater resources. Additional information was distributed about the AWWA Water For People program including bookmarks for the students.

**Nominations Committee**

by Mike Wentink, Nebraska Health & Human Services
(308.535.8135) e-mail: mike.wentink@dhhs.ne.gov

These positions are not open for nominations and will be filled automatically by the following officers:

- **Chair**
  - Dr. Bruce I. Dvorak, UNL Civil Engineering

- **Director**
  - Chris Koenig, HDR Inc.

- **Trustee & Past Chair**
  - Kevin Tobin, Metropolitan Utilities District

These positions require nominations and election. Nominations also will be open at the Fall Conference Business Meeting, November 6, in Kearney.

- **Chair-Elect**
  - John S. Olsson, Olsson Associates

- **Vice Chair**
  - Teresa Konda, HDR Inc.

- **Secretary**
  - Eric Lee, Lincoln Water System

- **Treasurer**
  - Rob Pierce, League of Nebraska Municipalities

- **Trustee**
  - David Lathrop, City of Seward

- **Trustee**
  - Doug Woodbeck, Nebraska Health & Human Services

Money for Seminars

The Nebraska Section AWWA realizes budgets are tight so we offer grants for water operators to attend seminars and the Annual Fall Conference.

To apply, download the application form from the website; call Jon Zellars, 402.504.7925, or e-mail jon_zellars@mudnebr.com.

Registration for the following courses is required at least two weeks prior to the class — seating is limited. Call Barb at 402.471.0523.

Public Water System Regulation Review

Health & Human Services Public Health Division recommends the review for Grade IV course attendees. The review begins at 1 p.m. on the afternoon prior to the two-day Grade IV course. Open to all: Three CEUs for Grades 1-4.

Grade IV: Cost is $80 for the class; $98 for the books if needed; $94 for certification.

Grade III: Cost is $200 for the class; $98 for the books if needed; $94 for certification.

Grades I and II: Cost is $200 for the class; $98 for the books if needed; $94 for certification.

Reminders for Certified Water Operators:

- A minimum of 15 hours of continuing education is required to renew a water operator certificate.
- If you moved since receiving your last water operator certificate, please notify Health & Human Services at 402.471.2713 to report the change of address.

Membership Committee

Jim Policastro Adesta, Omaha
The 100th Nebraska Legislature, second session, adjourned its 60-day session April 17. The Nebraska Section AWWA followed the proposals listed below. To see the entire bill, go to the Unicameral’s website: http://nebraskalegislature.gov.

**Signed by the Governor:**

- **LB 790** – (Erdman) Change buffer strip reimbursement. Signed by the Governor, 3.10.08. Bill becomes effective June 7, 2008.

**Killed or died:**

- **LB 387** – (Langemeier) Requires plumbing and water meter installation for new construction. **Killed 3.31.08**
- **LB 391** – (Mines) Changes provisions relating to public records and meetings. Among other things, requires a public body to have a form available to allow citizens to recommend subjects for agenda items. **Died on last day of session 4.17.08**
- **LB 493** – (Langemeier) Change provisions relating to the Water Policy Task Force. **Killed 1.30.08**
- **LB 622** – (Pirsch) Requires training courses in public records and the Open Meetings Act for all members of public body, public officers and public employees. **Died on last day of session 4.17.08**
- **LB 742** – (Johnson) Changes licensure requirements for engineers. **Died in committee.**

**More than 130 water professionals from across the U.S. came to Capitol Hill April 16-17 to raise critical safe drinking water issues with more than 300 members of Congress during the seventh annual Water Matters! Fly In event, sponsored by national AWWA.**

Nebraska Congressional representatives on the following issues.

**Chemical Security** — Asked for:
- Exclude public water systems from any federal authority to order the use of “inherently safer technology.”
- Exclude public water systems from any authority for the federal government to order a facility to shut down.
- Apply to drinking water systems only if they have chemicals of concern above identified threshold quantities.

**Invest in Water Infrastructure** — Asked for:
- Make repair and replacement of worn-out infrastructure and security improvements specifically eligible for DWSRF loans; and
- Encourage the use of asset management and provide for a longer repayment period for SRF loans.

**Prevent Pharmaceutical Compounds in Drinking Water** — Asked for:
- Direct EPA to work with states, water and wastewater utilities, and the agricultural community to minimize contamination of source waters by pharmaceutical products.
- Support pharmaceutical take-back programs to reduce the flushing of pharmaceutical products into sewage systems to the greatest degree possible.
- Continue to rely upon EPA’s science-driven Contaminant Candidate List (CCL) process to identify candidates for new drinking water standards.

**Climate Change** — Asked for:
- Fund a comprehensive, unified and coordinated federally sponsored applied research program.
- Consider the potential for unintended consequences of alternative energy technologies (such as biofuel development and carbon sequestration projects) on groundwater resources when developing new policies and legislation.
- Encourage the implementation of energy-saving, pollution-reduction, and alternative energy projects by drinking water utilities.

**Appropriations** — Asked for:
- $1 billion for the Drinking Water State Revolving Fund.
- $5 million for the AWWA Research Foundation.
- $1.35 billion for the Clean Water Act State Revolving Fund.
- $60 million for drinking water health effects research at EPA.

CHANGE SERVICE REQUESTED
Fall conference, November 6-7

National AWWA President Leonard to open conference

NATIONAL AWWA Michael J. Leonard will open the Annual Fall Conference November 6 with a town hall meeting at 8:30 a.m., November 6.

Since joining AWWA in 1974, Mike has served as chair and director of the Georgia Section. He chaired the Georgia-South Carolina Joint Technology Conference and served on numerous Georgia Section committees including Membership, Scholarship, Financial Audit, Water For People, Legislative and Young Professionals. In addition, Mike has represented the Georgia Section on the AWWA Board of Directors, and is a two-term vice-president.

He received the Fuller Award in 2001, Georgia Section William J. Green Award in 2003, GW&PCA Hugh A. Wychoff Award in 2002, US Environmental Protection Agency (EPA) Bronze Medals in 1997, 1987, and 1985 and EPA Special Achievement Awards in 1982, 1984-85 and 1987-89. Mike also is a life member of AWWA and the Georgia Association of Water Professionals.

Mike is the water operations manager, City of Roswell, GA. His past career experience includes general manager for the Atlanta-Fulton County Water Resources Commission, national expert for EPA Region 4 and technical consultant for a major engineering consulting firm. Mike also provided hands-on technical expertise in water treatment trouble-shooting, both nationally and internationally. He holds bachelor’s degrees in chemistry and industrial management and has maintained his Class I Water Treatment Operator’s license since 1975.

Mike and his spouse, Betsy, live in Alpharetta, GA.

Golfers raise $3,100

The Water for People golf benefit, May 9, at Quail Run Golf Course in Columbus, raised more than $3,100 for the organization, according to Craig Reinsch, Olsson Associates, event chair.

A total of 54 golfers and 14 hole sponsors participated in the event. Since the golf benefit was initiated in 2005, the Section has raised more than $9,750 for Water for People.

The first place team, included: Avery Quakerbush, Jim Fogerty, James Moore, Lincoln Water System, and Ricky Greene, Kids Planet Inc. Child Development Center.

Second place went to: Bruce Dreessen, Griffin Pipe; Joe McLaughlin, Matt Springer, HD Supply Waterworks, and Don Rutjens, Rutjens Construction.

The third place team included: Andrew Hansen, Black & Veatch; Nick McElvain, John Miriovsky, Lincoln Water System, and Jeff Selby, Pentair Pump.

Nominations Committee

by Mike Wentink, Nebraska Health & Human Services (308.535.8135) e-mail: mike.wentink@dhhs.ne.gov

These positions are not open for nominations and will be filled automatically by the following officers:

Chair Dr. Bruce I. Dvorak, UNL Civil Engineering
Director Chris Koenig, HDR Inc.
Trustee & Past Chair Kevin Tobin Metropolitan Utilities District

These positions require nominations and election. Nominations also will be open at the Fall Conference Business Meeting, November 6, in Kearney.

Chair-Elect John S. Olsson, Olsson Associates
Vice Chair Teresa Konda, HDR Inc.
Secretary Eric Lee, Lincoln Water System
Treasurer Rob Piercer, League of Nebraska Municipalities
Trustee David Lathrop, City of Seward
Trustee Doug Woodbeck, Nebraska Health & Human Services
This past summer was a busy time for many Section Members. The Water for People fundraising efforts were incredible! The golf tournament continues to be an extremely fun event and the First Annual Trap Shoot enjoyed a good start. Congratulations to all involved in organizing the events and the sponsors whose support is critical to their success. I hope everyone who participates in these events takes the time to thank the people who donate their time and money.

The Section is gearing up for our Annual Fall Conference November 6-7 in Kearney. It looks like Dr. Bruce Dvorak, UNL Civil Engineering, and the Fall Conference Committee have an engaging agenda planned (see page 3).

Bruce also has been busy planning a Section Retreat for Friday, August 22, at Mahoney State Park. Attendance at the retreat is open to all members, especially those interested in becoming more involved, plus Board Members and Committee Chairs. The retreat will provide a past-due opportunity to review our strategic plan, committee structure, membership, and a number of other issues. Please mark your calendars for August 22 and plan to attend.

I also would like to thank all who participated in development of a WARN organization in the State of Nebraska, Nebraska is now a WARN State. The Nebraska Section, after taking a hand-off from the efforts provided by AWWA, provided the initial effort in getting this effort organized. Special thanks to Rich Koenig, Nebraska Health & Human Services, and Eric Melcher, City of Aurora. Eric now chairs NeWARN Steering Committee.

This is my last column as chair. The time went too fast however, the Section will be in the very capable hands of Dr. Bruce Dvorak next year. Thank you for your confidence and support during my term. As always, if you have any questions or concerns, please contact me or any of the other Section Board Members. I hope to see you all at the Fall Conference.

Trap and skeet shooters raise money for Water for People. From left: Tim Mundorf, Midwest Laboratories; Rowdy Bindert, Test America, and Dave Dunning, HD Supply. See story on page 8.

*Wise Water Words* is published three times a year for members of the Nebraska Section American Water Works Association.

Lodging
Hotel reservations: 308.237.5971; reservations must be made by October 6 for the conference rate (Holiday Inn: $72.95 for single or double), plus tax.
The AWWA Annual Conference and Exhibition held in June in Atlanta was a success despite the ongoing repair work from the March tornados. On site registrations were strong, 150 new members joined, the bookstore set a new sales record, and the exhibits covered 456,500 sq. feet of exhibit hall space. Another strong indication of the success of the conference is that 88 percent of the available exhibit space for next year already has been sold.

The following are some key points from the Board of Director’s meetings:

- Utility Quality Management. The Association rolled out the G-series standards for the management of utilities. The purpose of the series is to provide management tools for the systems. Several other management tools are available through AWWA including Qualserv and Peer Review. These programs can be tailored to the size of utility and the desired level of involvement.

- Section/AWWA Communication. The Sections and AWWA are working to improve communication. The common request is to have staff visit the Sections on a more regular basis. The section reps also will take time to visit some of the utilities in the area as time permits. AWWA staff recognizes the value of face-to-face communication and is willing to make the visits.

- Public Information. AWWA recommends keeping our face in front of the press including announcements on board appointments, Top Op teams, seminars, etc.

- Younger Generation Marketing. Several of the Sections are starting to use Facebook, MySpace and UTube for recruitment, job postings and public information.

- Future ACE Locations. Las Vegas was approved for the 2018 conference. Beginning in 2019, ACE will rotate between six cities: Las Vegas, San Diego, Chicago, Denver, Orlando and Washington DC. The proposal provides several benefits including significantly less staff time in reviewing potential locations, better negotiating position with convention centers, and ease of conference planning. The major reason is that ACE has grown to the point that the number of available sites is limited.

- Changes. As promised, the new executive director, Gary Zimmerman, is taking a business approach to the Association staff and programs. A few key, selective staff replacements have been completed. The biggest change will be in the computer operating system. Gary intends to fully integrate the system to streamline the billing, ordering, records management and membership records. The website will likely be upgraded again in the near future.

- Program Changes. The Board will evaluate programs offered and make some hard decisions on the programs that are not profitable. Gary is a strong believer in the “Good to Great” philosophy and is working hard to achieve the great aspect for AWWA.

- Poster Session. The Young Professionals Poster Session is a tremendous hit at ACE. The Nebraska Section may want to consider submitting for next year’s conference.
The Section’s Water Utility Council joined more than 130 water professionals from across the U.S. April 16-17 in Washington, D.C., to raise safe drinking water issues with more than 300 members of Congress. Issues included: Chemical security, water infrastructure investment, pharmaceuticals in drinking water, climate change and funds for the water industry.

The group spent one-on-one time with Nebraska Senator Ben Nelson and Nebraska Representatives Jeff Fortenberry, Lee Terry and Adrian Smith.

The Nebraska Section was the No. 1 Section in 2007 for member retention. Our retention rate 93.60 percent. We achieved the top honor in 2004 (95.77%) and second in 2001 (92.56%).

According Membership Chair Rich Robinson, Kirkham Michael Consulting Engineers, our section is very active for a smaller section and provides many opportunities and services to its members.

2007 National AWWA President Nilaksh Kothari presents the George Warren Fuller Award to Tony Bilek, Mc² Inc., for outstanding service to the water industry. This is the highest honor given by AWWA.

2008 National AWWA President Mike Leonard presents Rich Robinson the 2007 Retention Award.

From left: 2004 Fuller Award Recipient Chris Koenig, HDR Inc.; 2007 Fuller Award Recipient Tony Bilek; 1998 Fuller Award Recipient Steve Kelley, Beatrice Board of Public Works, and 1989 Fuller Award Recipient Rich Robinson, Kirkham Michael Consulting Engineers.
At the turn of the last century it was not uncommon for U.S. citizens to die from waterborne diseases as cholera and typhoid fever. Today, these diseases are rare in this country. The reason for the dramatic decline has been called the greatest public health advancement of the millennium: Chlorination.

While different forms of water filtration have been around since ancient times, the use of chlorine in drinking water is a comparatively new practice.

British scientist John Snow pioneered its use in England in 1854 after finding that cholera cases were more pervasive in towns whose drinking water had not been filtered and in those whose water had been contaminated with raw sewage. His historical work set the stage for the initial use of chlorination in this country.

In 1908 the Chicago stockyards began adding chlorine to water supplied to livestock. Later that same year, Jersey City, NJ became the first U.S. urban area to chlorinate its water supply. At first the courts contested its use, however the subsequent sharp drop in diseases known to be waterborne, proved its worthiness. It didn’t take long for other water providers around the country to follow suit.

Omaha began chlorinating more than 90 years ago. Lincoln has been doing so since the 1930s. Today, approximately 75 percent of the people in this country drink chlorinated water.

While chlorine is not the only water disinfectant available, it is by far the most widely used. Its abundant use is due to its relatively low cost, availability and effectiveness. Chlorination of water systems with an adequate supply of high quality groundwater isn’t always necessary, but chlorine is there if you need it……and it has been for 100 years.

In memoriam

Wayne Bitting, retired water superintendent of the Beatrice Board of Public Works, died in a vehicle accident July 14. He was 83.

He joined the utility in 1946 and retired in 1990 with 44 years of service. According to Steve Kelley, Beatrice Board of Public Works, “Wayne hired nearly two-thirds of the employees in the current water department. He was an extremely good person to work with.”

Bitting received the George Warren Fuller Award in 1978 and the WISA Award in 1983. He also served on the Governor’s Advisory Council on Public Water Supply and the Lower Big Blue Natural Resources District.

Bitting served on the Beatrice City Council from 1990-2002, and was active in the Boy Scouts. He also was a Navy veteran.
National Drinking Water Week

On May 7, Governor Dave Heineman signed a proclamation declaring May 4-10 as Drinking Water Week in Nebraska. Attending the event were, from left: John Olsson, Olsson Associates (Nebraska Section AWWA); Joe Dvorak (Midwest Assistance Program); Reed Miller, Miller & Associates (Governor’s Advisory Council on Public Water Supply); Governor Heineman; Jerry Obrist, Lincoln Water System (Governor’s Advisory Council on Public Water Supply and Nebraska Section AWWA); David Houghtelling, City of Cambridge (Governor’s Advisory Council on Public Water Supply); Jack Daniel, Nebraska Department of Health & Human Services Division of Public Health; Larry Cast (Governor’s Advisory Council on Public Water Supply); and Lash Chaffin (League of Nebraska Municipalities and Nebraska Section AWWA).

Membership Committee
by Rich Robinson, Kirmham Michael Consulting Engineers (402.255.3840) e-mail: rlr@kirkham.com

Welcome New Members:
Steve Barry, PL Brico LLC, Omaha
Clancy Patrick Dempsey, Lincoln
John Ditter, JBS Swift, Grand Island
Niel Niedfeldt, Beatrice Board of Public Works
Jim Policastro, Adesta, Omaha

Brief Notes
Eric Berggren, HDR Inc., was one of 13 employees from the Water Division recently recognized as a “professional associate” for “professional excellence in their field who has demonstrated outstanding ability in their area of practice, authored or presented professional papers, trained and assisted others in their field.”

Top Ops and Non-Top Ops
It’s not too early to get your Top Ops Team (water operators only—three-person teams) together for the competition, Thursday, November 6, 3:30-5 p.m., at the Annual Fall Conference.

There also will be a competition for non water operators following the Top Ops event.

Contact Chris Koenig, HDR Engineering Inc, for more information (e-mail: chris.koenig@hdrinc.com; phone: 402.548.5112).

Trap and skeet shooters raise $1,300+ for Water for People
by Craig Reinsch, Olsson Associates (402.474.6311) e-mail: creinsch@oaconsulting.com

The First Annual Water for People Trap Shoot, coordinated by the Nebraska Section AWWA and Iowa Water Pollution Control Association (IWPCA), netted more than $1,300.

A total of 17 people (12 from Nebraska, 5 from Iowa) participated in the event June 3 at the Harry Koch Trap Range, Papillion.

The three high scores for skeet were Andrew Hansen, Black & Veatch (23), Jerry Hockmeier, Lincoln Water System (18), and Dave Dunning, HD Supply (17).

Hansen and Hockmeier tied for the top trap high score of 24. Mike Abbott, Lincoln Water System; Dunning; Cliff Stuthman, Stuthman Equipment, and Tom Walters, Nebraska City Utilities, tied with a score of 23.

Sponsors included: Cramer Engineering Services; Diamond Plastic Pipe; Engineering America; Grosch Irrigation; Hydro-Klean Inc.; Isco Pipe; LeGrande Excavation; Northwest Pipe Co.; Rutjens Construction; Schmidt-Greteman Associates; Superior Staffing; Snyder and Associates, and Test America.

Prizes were donated by Diamond Plastic Pipe, Fluid Technology Corp., Maguire Iron and Olsson Associates.

The funds allow Water For People to help people in developing countries improve their quality of life with sustainable drinking water resources, sanitation facilities and health and hygiene education programs.
Registration for the following courses is required at least two weeks prior to the class — seating is limited. Call Barb at 402.471.0523.

Public Water System Regulation Review

Health & Human Services Public Health Division recommends the review for Grade IV course attendees. The review begins at 1 p.m. on the afternoon prior to the two-day Grade IV course. Open to all: Three CEUs for Grades 1-4.

<table>

The agenda for the water operator training covers well and pump operation and maintenance; electrical safety (lockout/tagout), and regulatory and management asset updates. Each workshop begins at 8:30 a.m. and ends at 3:10 p.m.

**Who should attend?** City officials, city council members, board members, superintendents and well as water operators.

- Cost is $35 per person for lunch and workshop materials. Direct bill to municipality is preferred because weather may affect cancellation of workshops. Participants may pre-register one week prior to the workshop or register at the door.
- Workshop recertification credit is five CEUs for Grades 1-4.

**Water workshop reimbursement:**

Water operators from municipalities of less than 3,300, who attend water workshops may be eligible for reimbursement of registration, certification fees, materials and mileage.

Applications for reimbursement may be downloaded from the Nebraska Health & Human Services website: http://www.hhs.state.ne.us/crl/rcs/water/water.htm. For information, contact Mike Wentink, Nebraska Health & Human Services, 308.535.8135; e-mail: mike.wentink@dhhs.ne.gov.
The following individuals won hole/flag prizes: Adam Darbro, Olsson Associates; Jim Fogerty, Lincoln Water System; Ricky Greene, Kids Planet Inc. Child Development Center; Jim Hrouda, Steve Noren, City of Hickman; Troy Lagasse, North Core Boring Co., and Matt Springer, HD Supply Waterworks.

Mission Clay Pipe donated three golf clubs and they were won by Steve Kelley, City of Beatrice; Jerry Obrist, Nick McElvain, Lincoln Water System.

In 2007, Water For People provided more than 108,000 people with safe drinking water resources and/or improved sanitation facilities. The goal is to increase the number of people receiving sustainable water and sanitation services from 200 to 1,000 new people per day by 2011.

Special thanks to William Alms, David Graiver and Brent Hanson from the UNL, who assisted at the event. Thank you to all the participants, sponsors and flag prize donators for helping the Nebraska Section AWWA support Water For People as they work towards their millennium goals.

Louisville’s new treatment system to go on-line in 2008

With local groundwater supplies high in iron and manganese, the City of Louisville (populations: 1,080) has struggled with drinking water quality.

In 2005, the city began to investigate options for a new water source, including new groundwater wells or a connection to a rural water system. Upon completion of the study, the city decided to install another well plus a water treatment facility.

The new water treatment facility consists of an upflow clarifier and slow gravity sand filter with a capacity of 1,500 gpm. The facility is on top of 150,000-gallon clearwell. The water from the clearwell is introduced to the distribution system by two 1,000 gpm high service pumps.

The backwash water from the treatment system is collected and reintroduced to the treatment system to minimize discharge water from the treatment facility. Estimated at $2.2 million, the design of facility was completed by the JEO Consulting Group in 2005. It’s targeted to go on-line in 2008. —from The Link, JEO Consulting Group
