Who Should Attend?

- Water distribution operators
- Supervisors
- Managers
- Safety staff
- Purchasing staff

You Will Learn To...

- Critique your system repair program
- Determine safety issues
- Identify components of a pipe line repair plan
- Identify public relations within your plan

All water systems need pipelines repairs. Specific steps must be taken to ensure proper repairs, public safety, employee safety, system protection, and sanitation. This teleconference is a hands-on approach to developing a guide for preparing and implementing repairs, including working with private contractors. A pipeline repair checklist will be provided to participants for use in their utilities.
